EDUCATION

B.Sc Industrial Mathematics (Computer Science Option), Covenant University — September 2023
Relevant coursework — Computer Programming, Artificial Intelligence, Algorithm & Complexity Analysis.

TECHNICAL SKILLS

Languages and frameworks — HTML, CSS, JS, React JS, Next JS, Typescript, Angular, React Native (with Expo)
Technologies — Supabase, TailwindCSS, Git/Github, Framer Motion, Styled Components, Nativewind

WORK EXPERIENCE

Frontend Engineer — March 2025 - Present
Giddaa Housing — *Remote, Nigeria*

- Architected and integrated admin dashboard interfaces enabling full CRUD operations for blog and content management.
- Implemented client-side SEO and integrated REST APIs for UI functionality.
- Built performant UI components with React, Next.js, TypeScript, and TanStack Query to improve data fetching and user responsiveness.
- Identified and resolved bugs, improving application stability and performance across devices.

Frontend Engineer — July 2024 - April 2025
Cascadian Technologies — *Remote, Nigeria*

- Led frontend development of Qart (rebranding of CasCommerce), implementing product dashboards and responsive interfaces.
- Built engaging web interfaces for an investment banking site using Next.js and Tailwind CSS, ensuring cross-device responsiveness.
- Collaborated with teams to enhance UX and resolve semantic and accessibility issues on sister projects such as GinjaMe.

Frontend Developer Intern — February 2024 - May 2024
Ark Builders Enterprise — *Remote, Nigeria*

- Contributed to mobile application development using Angular, Ionic, and Tailwind CSS, resolving frontend tickets that improved functionality.
- Gained proficiency in Tailwind CSS and Ionic for mobile UI development.
- Led a team of interns in designing a business plan and UI strategy for the InvestNaira product, winning internal funding.

PROJECTS

TaxOga (https://taxoga.com/)

- Developed the frontend for TaxOga, a tax support platform, integrating backend services and implementing on-page SEO, structured data (schema), and sitemap generation to improve search visibility.
- Built using Next.js, TypeScript, Tailwind CSS, and Framer Motion for an interactive and responsive UI.
- Integrated dynamic content rendering and optimized for performance across devices.

Giddaa Housing: Blogs (https://giddaa.com/blog)

- Developed the blog module within the Giddaa platform, focusing on admin content management and public-facing article rendering.

- Built the admin dashboard using React, and implemented the public blog pages with Next.js, TypeScript, and Tailwind CSS.

- Ensured responsive design and a clean, user-friendly reading experience.

Monte Real Estate (https://monte-real-estate-motion.vercel.app/)

- Built a real estate marketing website focused on smooth page transitions and engaging user interactions.

- Implemented advanced UI animations using Framer Motion and CSS keyframes to improve visual flow.

- Developed with Next.js and Tailwind CSS, ensuring fast load times and full responsiveness across devices.

Qart (https://app.useqart.shop/)

- Built a web-based commerce platform enabling vendors to manage products, orders, and customer interactions.

- Developed reusable and responsive UI components for dashboards and core application pages.

- Integrated API services for real-time data fetching and state management.

- Implemented the application using Next.js, Tailwind CSS, and ShadCN UI components.

CraftSquarre (https://craftsquarre.vercel.app/)

- Built a landing site giving insight into the Craftsquarre community and encouraging merchants to join the waitlist.

- Developed with Angular and TypeScript with GSAP animations.

- Focused on readability and clear call-to-action design.
